

# ONEFLAT GERMANY HD

Heavy-Duty PVC-Flachschlauch mit Polyester-Gewebeverstärkung für Bau, Pumpentechnik und Hochdruck-Wasserförderung

|                     |                                                                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Applications</b> | pump technology, irrigation, fire damage restoration, water drain, construction machines                                                                          |
| <b>Structure</b>    | PVC coated polyester fabric, white, opaque, cross braid                                                                                                           |
| <b>Temperature</b>  | -10°C up to 60°C                                                                                                                                                  |
| <b>Properties</b>   | very high pressure resistance, very good abrasion resistance, very good low-temperature flexibility, good flexibility, good ozone- & UV-resistance, weather proof |
| <b>Optional</b>     | different diameters and different lengths available by request                                                                                                    |

| Inner Diameter (mm) | Max. Operating Pressure (bar) | Burst Pressure (bar) | Total Weight per Piece (kg) | Length (m) | Article Number |
|---------------------|-------------------------------|----------------------|-----------------------------|------------|----------------|
| 100                 | 14,00                         | 40,00                | 55,00                       | 100        | 111302100100   |
